

# DISTANCE EDUCATION UPDATE

## Distance education:

A new question 20(a) on the full-time StudentAid BC application asks applicants to indicate if their program is delivered by distance/blended education or delivered 100% on-site.

The information provided on the student's application for question 20(a) must match question 23 on the Appendix 3. If the information provided by the student does not match the institution's information, a letter will be generated and posted to the student's dashboard. The letter indicates that the student is required to contact the institution to request confirmation of the program's method of delivery.

## Reminder from Last Program Year:

If the student is unable to enter their program information because the program is continuous entry, or the program or program dates are not listed, an Appendix 3 will be required.

## When a Confirmation of Distance Education Eligibility (CoDEE) form is required:

If the program has not been reviewed as distance education for the current Program Year, the student will receive a Confirmation of Distance Education Eligibility (CoDEE) request letter, posted to their dashboard. The institution must submit the CoDEE form and supporting documentation to the StudentAid BC Designations Unit for program review.
